Net earnings per diluted common share	Net earnings	Net interest margin ("NIM")	Estimated Common Equity Tier 1 ratio

SECOND QUARTER HIGHLIGHTS¹

Net Interest Income and NIM	- Net interest income was \$593 million, up 7% - NIM was 2.87%, compared with 2.79%
Operating Performance	- Pre-provision net revenue ("PPNR") was \$310 million, down 9%; adjusted PPNR² was \$300 million, up 3% - PPP loans contributed \$15 million in interest income, compared with \$68 million - Customer-related noninterest income was \$154 million, up 11% - Noninterest expense was \$464 million, up 8%; adjusted noninterest expense² was \$463 million, up 11% - The efficiency ratio² was 60.7%, compared with 59.1%
Loans and Credit Quality	- Loans and leases were \$52.4 billion, up 2%; excluding PPP, loans and leases were \$51.8 billion, up 10% - The provision for credit losses was \$41 million, compared with (\$123) million - The allowance for credit losses was 1.05% of loans (ex-PPP), compared with 1.22% of loans (ex-PPP) - Nonperforming assets³ were \$201 million, or 0.4%, of loans, compared with \$308 million, or 0.6%, of loans
Capital	- The estimated CET1 capital ratio was 9.9%, compared with 11.3% - Shares of common stock repurchased during the quarter were 0.9 million for \$50 million
Notable items	- Credit valuation adjustment gain on client-related interest rate swaps of \$10 million, or \$0.05 per share, compared with loss of \$5 million - Deposits were \$79.1 billion, up 4%, and the loan-to-deposit ratio was 66%, compared with 68%

CEO COMMENTARY

Harris H. Simmons, Chairman and CEO of Zions Bancorporation, commented, "In the second quarter, we built on recent loan growth momentum, with average non-PPP loans increasing \$1.5 billion, or an annualized 12%. Customer-related noninterest income was also strong with year-over-year improvement of 11%. Adjusted revenue increased nearly 8% over the prior year, despite a significant reduction in PPP revenue as that portfolio runs off. Excluding the impact of PPP, adjusted revenue increased nearly 17% over the prior year."

Mr. Simmons continued, "We are particularly pleased with the credit performance of the loan portfolio. Our net charge-off ratio was an annualized 0.07% of average loans, and our nonperforming asset ratio fell to a very clean 0.4% of loans. Also, for the first time in several decades, our real estate owned figure was zero. We are well prepared for the possibility of a recession with solid credit quality and capital, and strong pre-provision net revenue growth."

¹ Rates are calculated using amounts in thousands and a tax rate of 21% for the periods presented.

Net interest income increased \$38 million, or 7%, to \$593 million in the second quarter of 2022, primarily due to an increase in average interest-earning assets and a higher interest rate environment.

Average interest-earning assets increased \$3.1 billion, or 4%, driven by strong growth in available-for-sale securities and commercial loans (ex-PPP), and was partially offset by declines in average PPP loans and money market investments. Average securities increased \$8.7 billion, or 49%, representing 32% of average interest-earning assets, compared with 22%, as we actively deployed excess liquidity into securities.

The net interest margin was 2.87%, compared with 2.79%. The yield on average interest-earning assets was 2.94% in the second quarter of 2022, an increase of eight basis points. The yield on total loans decreased 10 basis points to 3.67%. The yield on non-PPP loans decreased six basis points, due to lower yields on new originations during the past year arising, in part, from promotional rates on commercial owner-occupied loans and home equity credit lines that we utilized to deploy excess liquidity. The yield on securities increased 26 basis points to 1.97%, largely due to higher interest rates.

The annualized cost of total deposits for the second quarter of 2022 was 0.03%, compared with 0.04%. The rate paid on total deposits and interest-bearing liabilities was 0.07%, a slight decrease from 0.08% during the second quarter of 2021. Average noninterest bearing deposits as a percentage of total deposits were 51%, compared with 49% for the same prior year period.

In the second quarter of 2022, approximately 2,000 PPP loans totaling \$0.6 billion were forgiven by the SBA. PPP loans contributed \$15 million in interest income during the quarter, compared with \$68 million. During the same time periods, approximately \$10 million and \$36 million of the interest income from PPP loans was related to accelerated recognition of net unamortized deferred fees due to forgiveness, respectively. At June 30, 2022, the remaining net unamortized deferred fees on PPP loans totaled \$11 million.

Total customer-related noninterest income increased \$15 million, or 11%, to \$154 million, driven by increased customer activity across most fee categories, notably capital markets and foreign exchange fees, other customer-related fees, and commercial account fees.

Retail and business banking fees include overdraft and non-sufficient funds fees. Beginning in the third quarter of 2022, we expect to reduce the rate and frequency with which such fees are assessed. Relative to current activity levels, we expect this will reduce our customer-related noninterest income by approximately \$5 million per quarter.

Net securities gains and losses decreased \$62 million, mainly due to a large unrealized gain during the prior year period primarily related to the IPO of our SBIC investment in Recursion Pharmaceuticals, Inc.

Fair value and nonhedge derivative income increased \$15 million from the prior year period. We recognized a \$10 million gain during the quarter related to a credit valuation adjustment (“CVA”) on client-related interest rate swaps, compared with a \$5 million CVA loss in the prior year period.

¹ For information on non-GAAP financial measures, see pages 15-17.

Total noninterest expense increased \$36 million, or 8%, relative to the prior year quarter. Salaries and benefits expense increased \$35 million, or 13%, due to increased headcount, the impact of inflationary and competitive labor market pressures on wages and benefits, and increases in incentive compensation accruals arising from improvements in anticipated full-year profitability.

Deposit insurance and regulatory expense increased \$6 million, driven largely by a higher FDIC insurance assessment.

Other noninterest expense decreased \$5 million, or 17%, primarily due to the success fee accrual in the prior year period related to the IPO of our SBIC investment in Recursion Pharmaceuticals, Inc. Professional and legal services expense decreased \$4 million, or 22%, due to third-party assistance associated with PPP loan forgiveness and various other technology-related and outsourced services utilized in the prior year period.

The efficiency ratio was 60.7%, compared with 59.1%. For information on non-GAAP financial measures, including differences between noninterest expense and adjusted noninterest expense, see pages 15-17.

Loans and leases, net of unearned income and fees, increased \$1.0 billion, or 2%, to \$52.4 billion at June 30, 2022. Excluding PPP loans, total loans and leases increased \$4.9 billion, or 10%, to \$51.8 billion. Commercial and industrial loans, owner occupied loans, and municipal loans increased \$2.0 billion, \$1.0 billion, and \$0.9 billion, respectively. Home equity credit lines increased \$0.5 billion, and both consumer construction and 1-4 family residential mortgage loan portfolios increased \$0.2 billion.

Unfunded lending commitments and letters of credit increased \$2.3 billion, or 9%, to \$28.0 billion at June 30, 2022, primarily due to growth in our home equity and commercial credit line portfolios.

² Does not include banking premises held for sale.

Net loan and lease charge-offs were \$9 million, compared with net recoveries of \$2 million in the prior year quarter. During the second quarter of 2022, we recorded a \$41 million provision for credit losses, compared with a \$(123) million provision during the prior year period. The allowance for credit losses (“ACL”) was \$546 million at June 30, 2022, compared with \$574 million at June 30, 2021. The decrease in the ACL was due largely to changes in economic forecasts and improvements in overall credit quality. The ratio of ACL to total loans and leases (ex-PPP) was 1.05% at June 30, 2022, compared with 1.22% at June 30, 2021.

Deposits and Borrowed Funds

Total borrowed funds	<u>\$ 1,689</u>	<u>\$ 1,327</u>	<u>\$ 2,049</u>	<u>\$ 362</u>	27	<u>\$ (360)</u>	(18)

Total deposits increased \$3.0 billion, or 4%, to \$79.1 billion, primarily due to a \$2.2 billion increase in noninterest-bearing deposits. Average total deposits increased \$6.2 billion, or 8%, to \$80.9 billion, relative to the prior year period. Average noninterest-bearing deposits increased \$4.5 billion, or 12%, to \$41.1 billion, and were 51% and 49% of average total deposits for the respective time periods.

Total borrowed funds decreased \$0.4 billion, or 18%, to \$1.7 billion, from the prior year quarter. The decrease in long-term debt was primarily due to the redemption of \$290 million of senior notes during the first quarter of 2022, and the maturity of \$281 million of senior notes during the third quarter of 2021. The growth of deposits has allowed us to reduce borrowed funds.

The common stock dividend was \$0.38 per share, compared with \$0.34 during the prior year quarter. Weighted average diluted shares outstanding decreased 12.2 million, or 7%, from the second quarter of 2021, primarily due to share repurchases. During the second quarter of 2022, we repurchased 0.9 million common shares outstanding for \$50 million.

Accumulated other comprehensive income ("AOCI") decreased to a loss of \$2.1 billion at June 30, 2022, due to decreases in the fair value of fixed-rate available-for-sale securities as a result of changes in interest rates. Absent any sales or credit impairment of these securities, the unrealized losses will revert back to par over the remaining life of the securities. We have not initiated any sales of AFS securities, nor do we currently intend to sell any identified securities with unrealized losses.

Tangible book value per common share decreased to \$27.76, compared with \$40.54, primarily due to the significant decrease in AOCI previously described. Estimated common equity tier 1 ("CET1") capital was \$6.3 billion, compared with \$6.4 billion, and the estimated CET1 capital ratio was 9.9%, compared with 11.3%.

GAAP to NON-GAAP RECONCILIATIONS

(Unaudited)

This press release presents non-GAAP financial measures, in addition to GAAP financial measures, to provide investors with additional information. The adjustments to reconcile from the applicable GAAP financial measures to the non-GAAP financial measures are presented in the following schedules. We consider these adjustments to be relevant to ongoing operating results and provide a meaningful base for period-to-period and company-to-company comparisons. We use these non-GAAP financial measures to assess our performance, financial position, and for presentations of our performance to investors. We believe that presenting these non-GAAP financial measures permits investors to assess our performance on the same basis as that applied by our management and the financial services industry.

Non-GAAP financial measures have inherent limitations and are not necessarily comparable to similar financial measures that may be presented by other financial services companies. Although non-GAAP financial measures are frequently used by stakeholders to evaluate a company, they have limitations as an analytical tool and should not be considered in isolation or as a substitute for analysis of results reported under GAAP.

Tangible Common Equity and Related Measures

Tangible common equity and related measures are non-GAAP measures that exclude the impact of intangible assets and their related amortization. We believe these non-GAAP measures provide useful information about our use of shareholders' equity and provide a basis for evaluating the performance of a business more consistently, whether acquired or developed internally.

Efficiency Ratio and Adjusted Pre-Provision Net Revenue

The efficiency ratio is a measure of operating expense relative to revenue. We believe the efficiency ratio provides useful information regarding the cost of generating revenue. The methodology of determining the efficiency ratio may differ among companies. We make adjustments to exclude certain items that are not generally expected to recur frequently, as identified in the subsequent schedule, which we believe allow for more consistent comparability across periods. Adjusted noninterest expense provides a measure as to how we are managing our expenses; adjusted pre-provision net revenue (“PPNR”) enables management and others to assess our ability to generate capital. Taxable-equivalent net interest income allows us to assess the comparability of revenue arising from both taxable and tax-exempt sources.
